S/3098/18/TP	14, The Baulks, Sawston, Cambridge, Cambridgeshire, CB22 3NP	Ailanthus (T1) - re-reduce the crown by remove 2 to 3 metres from branch length (work to be carried out mid-late Summer 2019). This is continued management of the tree to prevent any nuisance to the neighbours at the rear. Walnut (T2) - reduce in height by 4m as the tree is becoming too tall for its location. Walnut (T3) - fell. The tree has development as a twim stem co-dominant form with a union at only 0.5m from the ground. The formation of the union looks to be weaker than optimal which is probably due to natural branch bracing from an early age. The felling of this tree would have mininal effect on amenity value due to the many mature surrounding trees.	<a href="http://plan.scambs.gov.uk/swift/lq/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3098/18/TP">http://plan.scambs.gov.uk/swift/lq/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3098/18/TP</a>

S/3132/18/TC	40, Angle End, Great Wilbraham, Cambridge, Cambridgeshire, CB21 5JG	T1 Species- wainut Crown spread North 8m, East 7m, South 4m, West 9m. Condition of tree appears Good. The first thing noticed whilst surveying the tree was the open cavity at approximately 1ft from ground level. This is on the south side of the tree. Upon investigation it was found that although it did not appear to be a column of decay going up the tree it appeared the decay was going into the buttress root on the western side. Deeming the Western side compromised. The tree is growing at a 40 degree angle and with the weight at present is only a matter of time before it falls without a significant amount of weight removed, on close inspection of the floor there is evidence of cracks in the ground leading me to believe that there is already some root movement. Going up the main stem and past the first fork onto the western stem at approx 20ft the tree has bark necrosis where the bark is coming away this required closer examination as this also could compromise the tree. The tree also has some medium size deadwood present throughout the tree which is to be expected for a tree of its age but should be removed for health	<a href="http://plan.scambs.gov.uk/swift/lq/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3132/18/TC">http://plan.scambs.gov.uk/swift/lq/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3132/18/TC</a>

S/3153/18/TP	Westgate Cottage, 7, Orwell Road, Barrington, Cambridge, Cambridgeshire, CB22 7SE	Our neighbours in 10 Old Mill Close, Barrington have asked if it's possible to have a crown lift on a single Ash Tree that borders our properties. The tree is on our land 7 Orwell Road. See attached plan - tree marked in orange. No impact to other trees. Neighbours are concerned that tree is looking unsafe/unbalanced, and 2 branches cover 1/3 of their garden, restricting most of the light. HERTS & CAMBS GROUNDS MAINTENANCE have looked at the tree and have suggested that by performing a crown lift of two of the lower limbs, the tree would be much better balanced, and would remove any immediate risk. They said this would cause no issues to the health of the tree. Neighbours in adjoining properties are aware and have no concerns. We are very happy to support this request, and provide access to our land. We would ask that HERTS & CAMBS GROUNDS MAINTENANCE carry out the work. They are qualified tree surgeons.	<a href="http://plan.scambs.gov.uk/rapid/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3153/18/TP">http://plan.scambs.gov.uk/rapid/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3153/18/TP</a>
