S/3191/18/TC	40, Pierce Lane, Fulbourn, Cambridge, CB21 5DL	<p>Trees detailed as follows: Sliver Birch, Smoke Plant, Sycamore, Yew tree, Rowan, Conifer, Hornbeam, variegated Laurel and general shrubbery. None of the detailed trees or plants are diseased.</p> <p>Planning permission is being requested for complete removal of all trees and shrubbery as the garden is in a conservation area. No trees have a TPO against them.</p> <p>We are requesting complete removal because all trees and shrubs have been planted to close together and so they are poor specimens.</p> <p>The positions of the trees are planted impractically for a domestic garden and there was no up keep from the previous owner. We would like to landscape the garden and replant some young trees that are native to Britain.</p> <p>Please note, the trees with a symbol (marked in red on the sketch map) on the plan have died. These trees lean against our properties fence and although they have not yet caused damage, they have the potential to do so if not removed.</p>	<a href="http://plan.scambs.gov.uk/rapid/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3191/18/TC">http://plan.scambs.gov.uk/rapid/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3191/18/TC</a>

S/3415/18/TC	40, Pierce Lane, Fulbourn, Cambridge, CB21 5DL	<p>We submit this application to request complete removal of 1 x mature sycamore tree in a conservation area. The tree is shown on the attached diagram with an * symbol , and is at the beginning of the access to the property from Pierce Lane. Unfortunately, the sycamore causes a safety hazard for cars coming out of this access, as it impeaches the view to on coming vehicles on the road. The sycamore also restricts the size of vehicle able to come down the access. As we are looking to renovate the property (40 Pierce Lane) in the near future, the trees would prevent trucks and /or lorry's getting to the house, if it was to remain in its current location. It is worth noting that the sycamore is not diseased and was previously topped in 2016.</p> <p>Please note our previously submitted application ref: S/3191/18/TC which is currently under review. We request that both applications are review together if possible, as the locations are the same</p>	<a href="http://plan.scambs.gov.uk/swift/lq/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3415/18/TC">http://plan.scambs.gov.uk/swift/lq/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3415/18/TC</a>

S/3628/18/TC	28, High Street, Hinxton, Saffron Walden, CB10 1QY	<p>No trees in our garden have TPOs but we are in a conservation area. The trees we would like to fell/trim are creating an excessively dark garden in which we cannot get anything to grow successfully. We plan to replant many more shrubs/flowers, and keep the newer trees in the sunnier part of the garden and along one fence. Work to be done: Pine Tree (T1) (30cm diameter at 1.3m above ground)- fell because of excessive shading preventing growth of other plants in the garden, very large size (approx 40ft), undue mess due to pine needles. Tree surgeon stated that they suspect this is Christmas tree that was planted. White beam (T2) (28cm diameter at 1m above ground) - fell because of unsafe proximity (2.5m) to house (for insurance and concerns over damage to foundation due to roots), it also produces excessive shading of house meaning no light gets into bedrooms, and fungal growth on the house exterior. Approx 30ft. Note: we could not measure this at 1.3m above ground as the branches fan / split from trunk. We wish to fell to avoid a more catastrophic collapse of the tree. We are not sure whether to replant because the area is becoming dominated by the adjacent silver birches at 20 Ashen Green, which have been allowed to grow unchecked.
