S/3903/18/TC	10, High Street, Little Abington, Cambridge, CB21 6BG	We have a small holly tree, approx. 6m tall, close to the boundary with our neighbours at 4 High Street. The trunks are within 2m of the boundary fence, and part of the canopy overhangs their garden. The tree has a large and growing split/wound in the main trunk, which appears to have been caused by disease. It also has a dense and chaotic top-heavy canopy, which blocks out a considerable amount of light, both for us and the occupants of 4 High Street. The tree is only fully visible to us and three of our neighbours. It cannot be viewed by the general public (aside from a tiny section that is visible through a narrow gap between us and our closest neighbour, 12 High Street). Consequently we would like permission to fell the tree and replace it with a something more appropriate to the position, such as several small acers or a dwarf birch. We live in a designated conservation area, which is why we are making this application. According to maps available via the planning portal, the tree is not subject to a TPO. Many thanks for your help. Dr Sarah Heard	<a href="http://plan.scambs.gov.uk/swift_lq/apas/run/WPHAPPDETAIL_DisplayUrl?theApnID=S/3903/18/TC">http://plan.scambs.gov.uk/swift_lq/apas/run/WPHAPPDETAIL_DisplayUrl?theApnID=S/3903/18/TC</a>

S/3929/18/TP	14, Green End, Comberton, Cambridge, Cambridgeshire, CB23 7DY	1) 1) Himalayan Chestnut - TPO ref: 12/05/SC - fell. This tree has extensive die-back throughout its crown with many branches completely defoliated. Closer examination shows that the bark on the stem is loose around 3/4 of its circumference from ground level to about 1.5m. There are no obvious signs of external damage. There are some brown exudations from the bark (syn. with P. syringae although no lab tests have been carried out) both on the dysfunctional bark and elsewhere. (Whatever the cause, with a such a big decrease in sugars being sent to the roots over recent years it seems likely they have been using up their reserves of sugar and, now those reserves are running out, the root hairs are dying - hence the symptoms in the upper crown.) It is not known how long the bark has been loose on the stem. The owners are keen to replace the tree with a different species that gives a similar dappled shade.	<a href="http://plan.scambs.gov.uk/swiftlg/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3929/18/TP">http://plan.scambs.gov.uk/swiftlg/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3929/18/TP</a>

S/3947/18/TC	2, Thatchers Wood, Longstanton, Cambridge, Cambridgeshire, CB24 3BX	One small Elm, fell because the specimen is dead. One large Elm, likely to need to be felled, perceived dead. One Elm, for review, possibly dying may need to be felled. These trees are close to a small population of Elms in the conservation area, by felling deceased trees with possibility of elm disease will protect the population. Advice will be sought if there is any possibility to rescue any of these trees. Conifers planted in the last 2 years, and at least one indigenous sapling is being encouraged to grow nearby. (Not elm).	<a href="http://plan.scambs.gov.uk/swiftlg/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3947/18/TC">http://plan.scambs.gov.uk/swiftlg/apas/run/WPHAPPDETAIL.DisplayUrl?theApnID=S/3947/18/TC</a>
