S/3719/18/TC	Pettetts Barn, High Street, Hinxtton, Saffron Walden, CB10 1RF	14 fruit trees (Prunus) marked on the sketch plan as areas P1, P2, P3 and P4 to be felled because they are diseased, stunted and have low amenity value. Many of the branches are dead and malformed, a tree surgeon has confirmed that they have a fungus infection that is common on this type of tree and it will kill the whole tree. These were not planted but have clearly developed as runners from trees in the neighbouring garden. Replant this area of the garden with a variety new native trees including Acer, Crataegus and Sorbus. S/3722/18/TC	86, High Street, Hinxtton, Saffron Walden, CB10 1QY	Ash tree (A1) - reduction of the crown. This is a very large old tree and the branches have become very heavy causing large branches break off when it is windy and stormy. A tree surgeon has inspected the tree and recommended reducing the branches by 2-3 metres around the whole of the tree. The tree is in the garden of The Old Byre directly on the fence between that garden and the garden of Pettetts Barn. We have agreed with the owner that both sides of the tree should be reduced. S/3786/18/TC	232, High Street, Cottenham, Cambridge, CB24 8RZ	1) The largest tree might be an ornamental Alder but I am not sure. It's about 30 feet tall and has several dead and dying branches that we need to remove. 2) The second smaller tree is perhaps 12 to 15 feet tall and I guess it's an ornamental Cherry tree. We want to trim the tops off the longer and over-grown branches so it has a better shape. 3) The last tree is round and ornamental and I'm told we've allowed it to become too big. We need to reduce the size (but keep the shape) to make space for repairing and replacing our falling-down garden fence.
