S/4183/18/TC	Ickleton Lodge, 14, Frogge Street, Ickleton, Saffron Walden, Cambridgeshire, CB10 1SH	I confirm the intention is to remove dead wood and some diseased wood where necessary. The tree surgeon says this will reduce the overall height by 1/3rd. He said that this is a very old willow with limited future life but hopefully some years. The tree is a 60 year old weeping willow close to front of house. Two photos are attached. Tree Surgeon recommendation is to cut out diseased wood, reducing height buy approx. 1/3 existing. Tree is close to house and partly overhanging front path and now considered a safety hazard. S/4188/18/TC	The Willows, 102, High Street, Landbeach, Cambridge, Cambridgeshire, CB25 9FT	There is a corkscrew willow (Salix matusudana) at the bottom of our garden. It is growing in the position marked with an X on the diagram. I know these trees are short-lived and I suspect this one might be reaching the end of its life, as some of its branches are dying back. We want to have it cut down, as it is taking a lot of water from an already very dry garden. It has a split trunk, which I know is not desirable and its also too close to a high brick wall, so might cause problems for the foundations of the wall with its shallow roots. We have already planted two extra trees in our garden and hope to plant more.	No Objections	03/12/2018	http://plan.scams.gov.uk/swift/ig/apas/run/WPHAPPDETAIL.DisplayUrl?theApnlD=S/4188/18/TC
