	S/1283/19/TC	1 Merton Grange Barns, The Forge, Station Road, Gamlingay, SG19 3DS	We live in a conservation area and have large lime tree in our garden. A tree surgeon has informed us that due to a large seam running through the base of the tree, and the fact that the tree backs onto a field making it prone to high winds, there is a real risk of the tree (or some large branches) falling onto our house within the next 12 to 24 months. We therefore need to remove the tree, and replace with 2 or 3 smaller trees further away from the house.	10/04/2019	http://plan.scams.gov.uk/swift/g/apas/run/WPHAPPDETAIL_DisplayUrl?theApriID=S/1283/19/TC

Great Shelford CP					

	S/1206/19/TP	Land North West of 197, Hinton Way, Great Shelford, Cambridgeshire, CB22 5AN	Various trees within (A2, A3, A4, and A5) may need to have branches reduced because the trees are located along the driveway up to 'Uplands' as the building was formerly known. A permitted development application has been accepted to demolish the old building on the grounds of health and safety. However, in order for the large machines required for the demolition to drive freely up the driveway to the building some overhanging branches from various trees may need to be removed. The contractors have identified the trees that may require branches to be trimmed back, these have been identified on site by a yellow circle sprayed onto the tree and arrows on the driveway indicating the trees position. The site is subject to blanket tree preservation orders and the areas that contain trees that may obstruct access are contained in areas A2-A5 as shown on the attached plan. A2 consists mainly of Yew, Beech, Ash, Sorbus, Sycamore, Holm Oak, Norway Maple, Holly, Cherry, Oak, Birch, Horse chestnut and Lime. A3 consists of mainly Ash, Sycamore and Beech. A4 consists mainly of Larch and Acres and A5 consists of mainly...	05/04/2019	http://plan.scams.gov.uk/swift/g/apas/run/WPHAPPDETAIL_DisplayUrl?theApriID=S/1206/19/TP

Orwell CP					
	S/1281/19/TC	66, High Street, Orwell, Royston, Cambridgeshire, SG8 5QN	T1 - Ash - This mature specimen exhibits multiple large Innonotus Hispidus brackets throughout. There are many old brackets that have fallen at the base of the tree suggesting considerable internal decay. Considering the presence of the fungus and the current height and sail of the tree, as well as its proximity to the neighbors roof, the power cables and main road (directly above), I propose a 30% reduction (8m) in to alleviate weight and sail effect and hopefully avoid branch failure in future.	10/04/2019	http://plan.scams.gov.uk/swift/g/apas/run/WPHAPPDETAIL.D?displayUrl?theApnlID=S/1281/19/TC
