

Request 7727 – Planning Approvals

I would like to ask how many new build housing planning applications have been passed outside settlement boundaries since 2015.

Furthermore I would like to ask how many planning applications have been made and how many have been approved since 2015 relating to policy H/15 of the South Cambs Local Plan or it's equivalent policy if prior to September 2018 when the current local plan was adopted.

Response

I would like to ask how many new build housing planning applications have been passed outside settlement boundaries since 2015.

The [Annual Monitoring Report 2018-2019](#) includes data on the number of dwellings built outside of development frameworks (settlement boundaries). It has a figure of 1,501 dwellings (net, so gains and losses) being completed in the countryside in Greater Cambridge for 2011-2019. For South Cambridgeshire, the figure is 1,492 dwellings (net) for 2011-2019.

Furthermore I would like to ask how many planning applications have been made and how many have been approved since 2015 relating to policy H/15 of the South Cambs Local Plan or it's equivalent policy if prior to September 2018 when the current local plan was adopted.
