

Request 7848 – Environment, electric vehicles

(SCDC) On-street charging points for electric vehicles within a residential area

- 1) The total number of council owned on-street charging points within a residential area and their location (i.e. street name).
- 2) If applicable, the total number of connectors in respect of the charging points in residential areas as outlined in Q1. For example, two charging points with a total of four connectors.
- 3) If applicable, the prices paid for using on-street charging points within a residential area, along with any discounts offered for residents.
- 4) If the council has applied for grant funding for on-street charging points within a residential area. If applicable, please advise how much the council applied for and how much was granted.
- 5) What, if any, budget has been set aside to install council owned on-street charging points within a residential area.
- 6) When the council intends to install its first council owned on-street charging point(s) within a residential area.

Response

- 1) The total number of council owned on-street charging points within a residential area and their location (i.e. street name) none at present.
- 2) If applicable, the total number of connectors in respect of the charging points in residential areas as outlined in Q1. For example, two charging points with a total of four connectors. Not applicable
- 3) If applicable, the prices paid for using on-street charging points within a residential area, along with any discounts offered for residents. Not applicable
- 4) If the council has applied for grant funding for on-street charging points within a residential area. If applicable, please advise how much the council applied for and how much was granted. Not applicable
- 5) What, if any, budget has been set aside to install council owned on-street charging points within a residential area. None within current 2020-21 budget although this is an area we will be looking at shortly in relation to installing EVCPs on Council owned land close to Council owned residential properties.

- 6) When the council intends to install its first council owned on-street charging point(s) within a residential area. A project to look at the feasibility of this is expected to be completed by end of March 2021; EVCPs likely to be delivered in 2021-2
