

## Request 8742 Anglian Water Services Request

I am working on a project as part of a team of environmental consultants on behalf of Anglian Water services. As a part of our work we would like to request information from the South Cambridgeshire District Council to obtain any datasets for:

- Strategic development sites (e.g. Major housing, energy, or industrial sites)
- Committed development including those under construction
- Safeguarded land (e.g. Mineral safeguarded land or renewable energy safeguarded zones)
- Operational airfields (e.g. Aerodrome safeguarding zones)
- Neighbourhood plan areas
- Local Wildlife Sites / Country Wildlife Sites / Sites of Importance for Nature Conservation (SINC) / SBIs / SLNCIs / SNCs
- Part 2a register and brownfield register
- Areas of known archaeological importance
- Historic Landscape Area (Historic Environment Record)
- Residential, employment, business/industrial use, mixed-use site allocations
- Green infrastructure
- Employment areas
- New transport infrastructure
- Protected open land
- Towns, village greens and common land
- Tree preservation orders (TPOs)
- Hazardous installation sites

This data would be used to inform the project's development work and particularly the environmental assessment. It would be preferable to have the data in GIS format.

I have attached a GIS shapefile of the current area of interest (named Study\_Area) for which we would like to request data. Please let me know if you would like this information in any other format.

In regards to “Potentially contaminated land / contaminated land” this department have said ‘If there is a plan of the area of interest we can provide a plan of the potentially contaminated land which may be relevant in that area. We cannot give out our whole GIS dataset relating to potentially contaminated land across the district as these areas are under investigation as part of our Contaminated Land Inspection Strategy.’ the register can be found on [our website](#).
