

Request 8886 New Property Addresses

For 2019 and 2020, we would appreciate a list of all the new properties constructed within the local authority. Please can the UPRN be attached to each address.

We would appreciate if the data be provided in either an Excel or csv format for commercial purposes.

Response

We confirm we do hold information relevant to your request and are treating this as a reuse of public sector information request under the 'Reuse of Public Sector Information Regulations 2015' as set out by the [Information Commissioner](#).

New property addresses and their UPRN's are found in the Local Land Property Gazetteer (LLPG) which is produced by Ordnance Survey (OS).

Whilst we do provide new property address data to OS specifically for the LLPG, and OS provide the UPRN, we are unable to grant re-use as it is made available under a licence or user agreement with OS. You can find more information about this data set and how to gain access to it here: [Ordnance Survey | See A Better Place](#) and [AddressBase Plus | Local Authority Addresses, Multi-Occupancy Addresses and OS MasterMap References | Vector Map Data \(ordnancesurvey.co.uk\)](#)

We appreciate you will be disappointed in this response, but hope our explanation above and weblink provided are useful.
