

Request 9388 – Water Supply Records

I am completing an environmental study for a site in Northstowe, Cambridge and wondered if this is the correct contact to enquire about private water supply records (if not can you please forward the correct contact)? I'd like to request any private water supply data you may have within 5km of the site located at Easting: 539942, Northing: 267203 (TL 39942 67203). It would be useful to know of the location and any other details you can provide on private water supplies (i.e. groundwater abstractions) within this area (map search area shown below).

Response

There is 1 private water system located at a domestic property on Over Road, Willingham which is just within 5km of the site in Northstowe.

As the private water supply is a single domestic, we cannot release the property details.

It may be possible for a further search to be undertaken by [Land Charges](#).
