Pentaco Construction understands that construction - by its nature - can be disruptive and can cause inconvenience to our neighbours. We hope that with regular communication we can minimise the impact of any disruption. This newsletter – along with future updates - is intended to report the progress on site and inform you of any future works which may have potential short-term impact on your everyday activities.

By working with you and keeping you regularly updated, we hope that the process of delivering this project can be a stress-free and positive experience for all.

Progress to date:

Continuation of reduce level dig and form new levels, for south carpark area.

Internal blockwork is nearly complete. The underfloor heating and insulation have gone in, and the floor screed has been poured.

A look ahead:

Feature blocks for external facade will be constructed over the coming weeks, transforming the appearance of the building.

Internal fit out will commence shortly throughout the building.
