

**25/10/2010 Notification of CNPI from Harrow Estates by email**

We have received the GCMS characterization results for grid squares G12, G13 and G14. Three CNPI were found, two of which have been identified in previous reports. There is one compound (nicotine) which has been found and will be taken forward for further risk assessment and will be reported within the 28 day period

Regards

Mark Nicholls
