

Viewpoint 15- Hattons Roads, facing east

Date taken: 13th February 2014 Pentax K30, 35mm lens/stitched panorama

Assessment notes

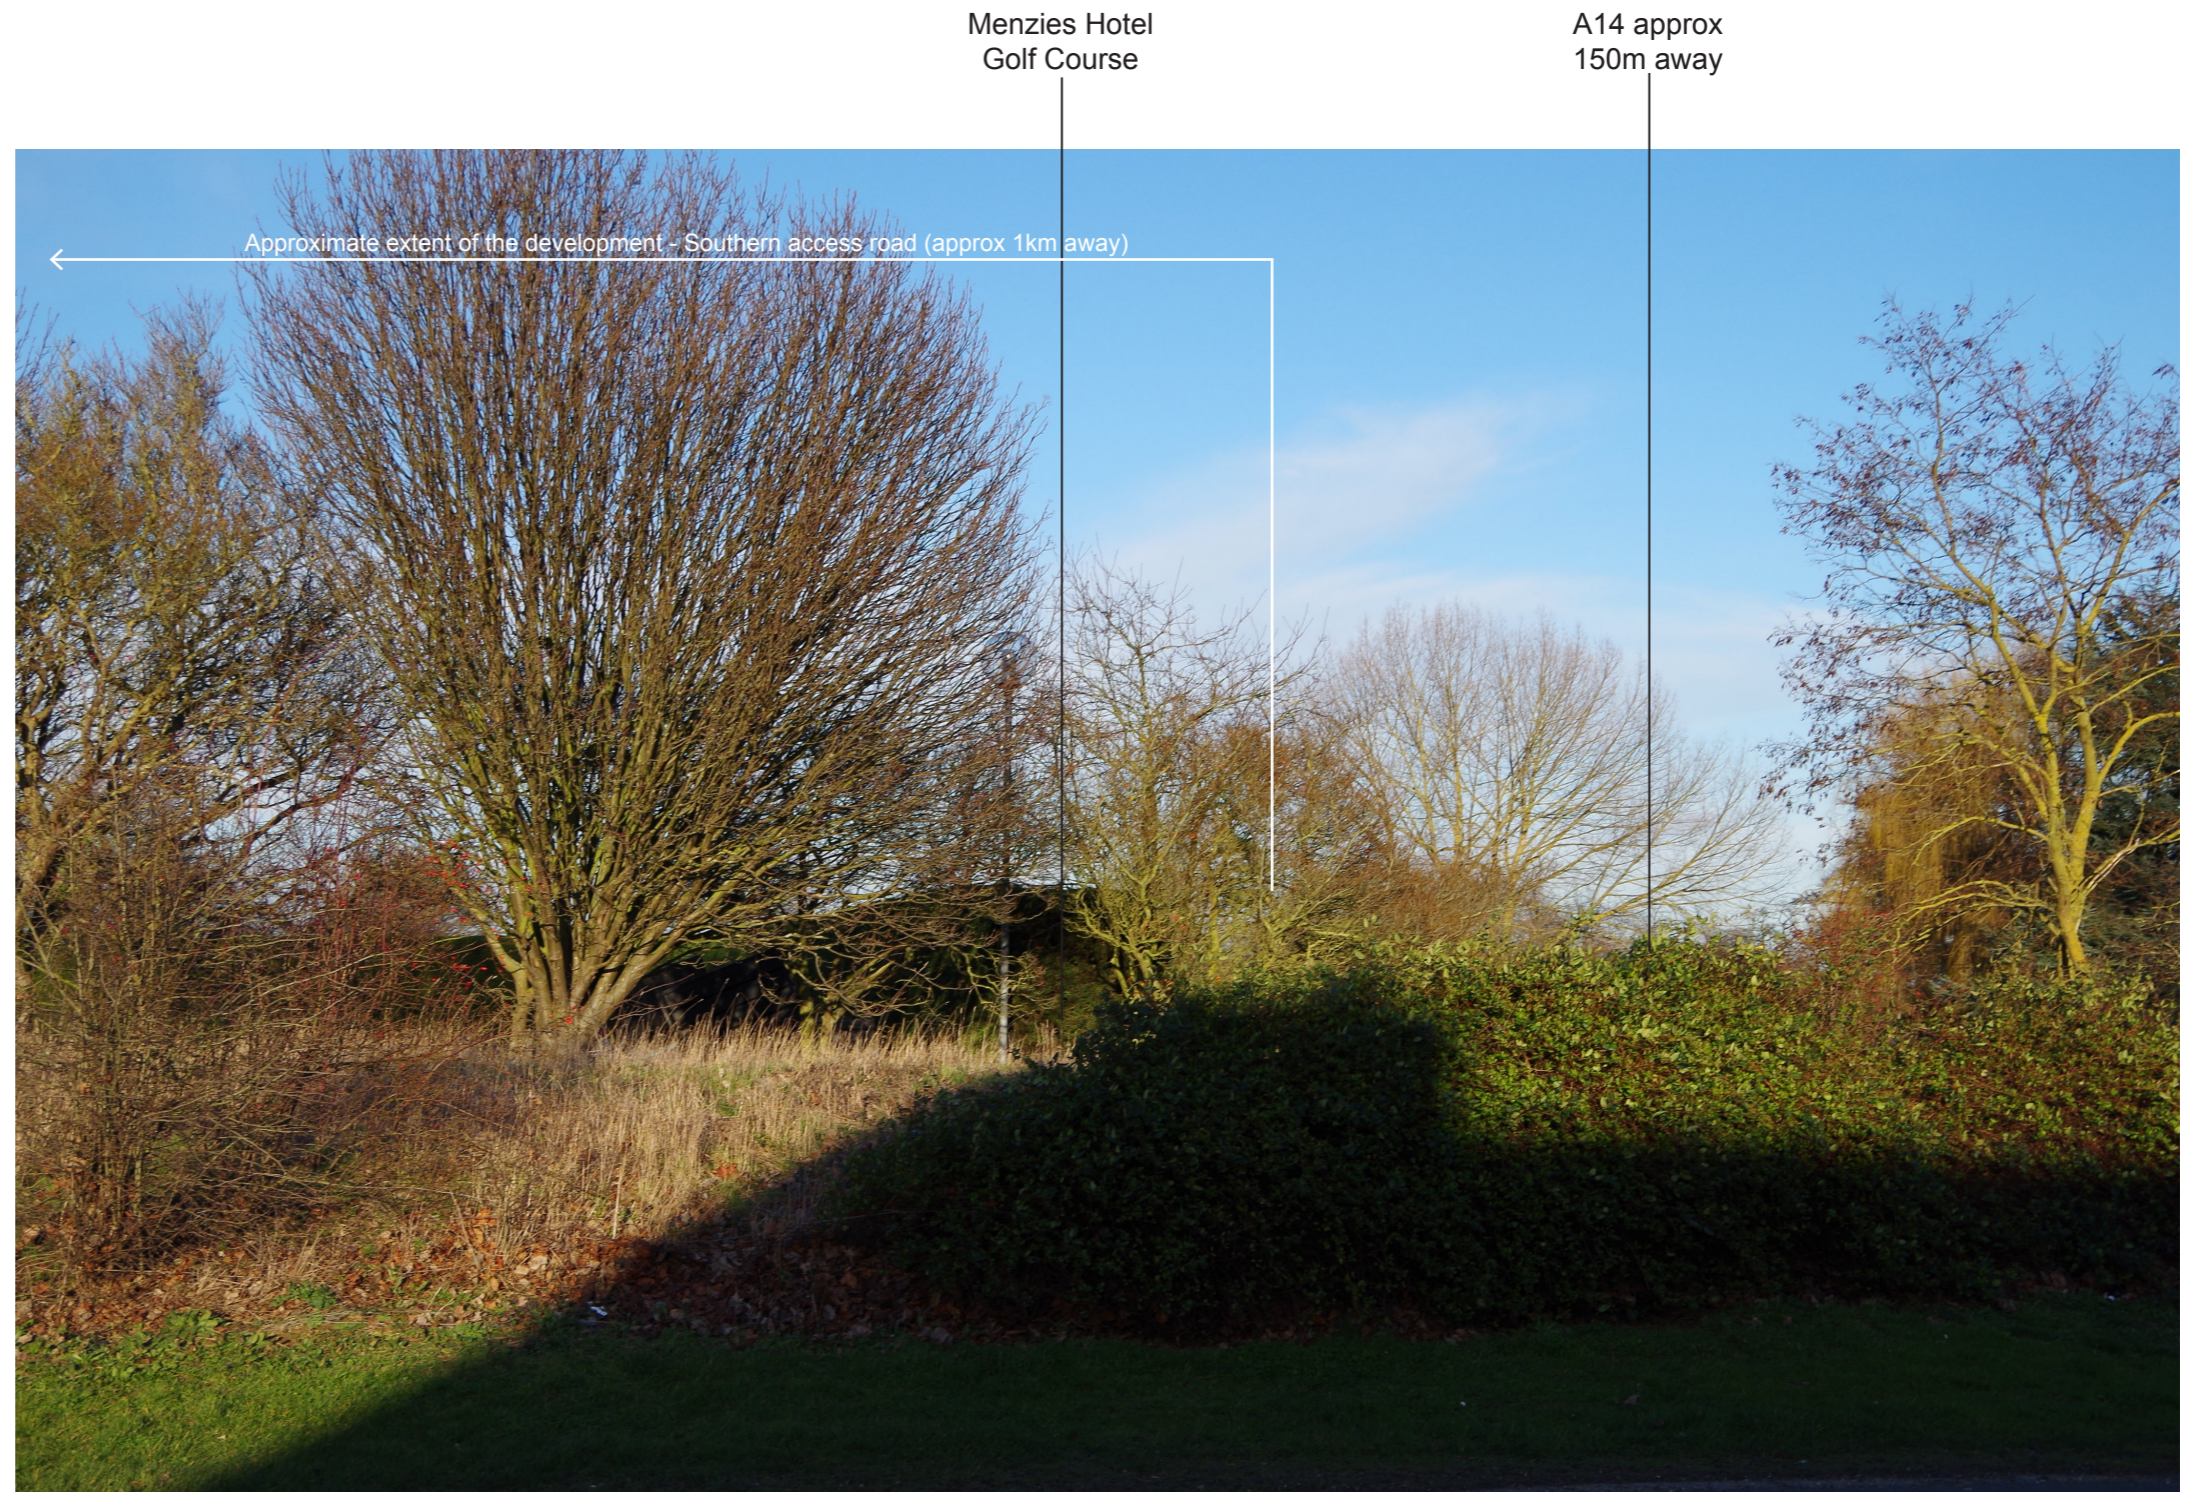

Construction Phase:

Earthworks, stockpiles and machinery would create substantial new features that would be highly visible and at variance with middle ground views of arable fields and boundary vegetation.

Operational Phase:

The new infrastructure would constitute incongruous new features in the view that would be continuously visible in the middle ground.

Viewpoint 16 – Crafts Way, Bar Hill, facing north east

Assessment notes

Construction and Operational Phase:

Due to the localised topography and extensive tree belts and vegetation aligning the A14 boundary the proposed development would not be visible from this location.
