1. Introduction

- 1.1 This document provides a record of the Sustainability Appraisal (SA) process, which has been followed for the 'Issues and Options 2 Part 1 Joint Consultation on Development Strategy and Site Options on the Edge of Cambridge'. This has been a joint process carried out by both Cambridge City Council and South Cambridgeshire District Council. The first part of this document describes the SA processes both authorities have carried out to date in the development of their Local Plans. The second part sets out how the SA has been carried out for the following three elements, which are covered in the Issues and Options 2, Part 1 consultation Document:
 - the Sustainable Development Strategy for Cambridge and South Cambridgeshire to 2031;
 - the site options on the edge of Cambridge, on land currently in the Green Belt;
 - the Sub-Regional Sporting, Cultural and Community Facilities.

Background

- 1.2 Both authorities are carrying out an SA of their Local Plan in line with the procedures prescribed by the Environmental Assessment of Plans and Programmes Regulations 2004, which were prepared in order to transpose into national law the EU Strategic Environmental Assessment (SEA) Directive. SA is integral to plan making and ensures that the environmental, economic and social effects of a plan are assessed, and that reasonable alternatives are considered. As a result the SA guides the development of plans in order that they are developed in the most sustainable way, avoiding and mitigating adverse effects and maximising positive effects.
- 1.3 Cambridge City Council have employed consultants URS to carry out the SA of the Cambridge Local Plan. South Cambridgeshire District Council have carried out the SA 'in-house'.
- 1.4 The first stage in the SA process is to establish the scope. Both authorities have produced Scoping Reports, which identify the sustainability 'baseline', future changes to the 'baseline' and the key issues that should be the focus of the SA. The Scoping Reports were subject to consultation with the relevant consultation bodies (English Heritage, Natural England and the Environment Agency) before they were finalised.

Cambridge Scoping Report

1.5 The Cambridge Local Plan SA Scoping Report can be found at the following link:

http://www.cambridge.gov.uk/public/docs/Sustainabiliy-Appraisal-Scoping-Report-June2012.pdf

- 1.6 This identified a number of key sustainability issues, and set out a framework for undertaking the rest of the appraisal under eight thematic topics:
 - Communities and well being
 - Economy
 - Transport
 - Water
 - Flood risk including climate change adaptation
 - Climate change mitigation and renewable energy
 - Landscape, townscape and cultural heritage
 - Biodiversity and green infrastructure
- 1.7 Five functional areas, sub-divisions of Cambridge, were identified for consideration throughout the SA process:
 - City Centre
 - North Cambridge
 - South Cambridge
 - East Cambridge
 - West Cambridge

South Cambridgeshire Scoping Report

1.8 The South Cambridgeshire Local Plan SA Scoping Report can be found at the following link:

http://www.scambs.gov.uk/Environment/Planning/DistrictPlanning/Local DevelopmentFramework/SCLP.htm

1.9 The report identified 10 themes, and for each of them explored the policy context, the current situation, and key sustainability issues and problems.

Environmental	Social	Economic
Land	Health	Economic Activity
Pollution	Housing	Transport
Biodiversity	Inclusive Communities	
Landscape and		
Townscape		
Climate Change		

1.10 The outcome of the 'Scoping' stage of the SA process is a set of 23 Sustainability Objectives, which can be used to test policy and site options to identify the potential impacts and their relative sustainability.

Issues and Options 1 (2012)

- 1.11 Both authorities have consulted upon an Issues and Options Report, and accompanying these were Interim SA Reports. Both of these Issues and Options Reports considered policy options and approaches for the Green Belt, including an assessment of 10 'Broad Locations' on the edge of Cambridge.
- 1.12 South Cambridgeshire's Issues and Options Report also considered potential sites for development for different types of land use throughout the district.

Cambridge Interim SA

- 1.13 The Cambridge Interim SA Report can be found at the following link: <u>http://www.cambridge.gov.uk/public/docs/local-plan-review-sustainability-appraisal.pdf</u> (Also see errata sheet <u>http://www.cambridge.gov.uk/public/docs/local-plan-review-sustainability-appraisal-errata.pdf</u>)
- 1.14 Findings of the SA will be used by officers to develop policies in the draft Cambridge Local Plan. The appraisal of the Broad Locations was taken into account in the assessment of the fringe sites.

South Cambridgeshire Initial SA

1.15 The South Cambridgeshire Interim SA Report can be found at the following link:

http://www.scambs.gov.uk/Environment/Planning/DistrictPlanning/Local DevelopmentFramework/SCLP.htm

1.16 The Initial Sustainability Appraisal considered how the options proposed in the Issues and Options Report 2012 perform against the Sustainability Objectives, whether there is likely to be positive or negative impacts, and the significance of the impact.

Issues and Options 2 (2013)

1.17 This is the current stage of plan making for both authorities. Part 1 is a joint consultation by both authorities addressing the development strategy for the sub-region, sites at the fringe of Cambridge in the Green Belt, and options for sub-regional sporting, cultural and community facilities. Each authority will also have a separate Part 2 consultation addressing site options and other district specific issues.

Initial / Interim Sustainability Appraisal of Issues and Options 2 – Part 1 Joint Consultation on Development Strategy and Site Options on the Edge of Cambridge'

- 1.18 The remainder of this document provides an initial sustainability appraisal of the sites and options addressed in the joint consultation.
- 1.19 It is divided into three parts, reflecting the consultation document:
 - A Sustainable Development Strategy for Cambridge and South Cambridgeshire to 2031
 - Green Belt Site Options
 - Sub-Regional Sporting, Cultural and Community Facilities
- 1.20 For each part the following are detailed:
 - Identification of Reasonable Alternatives
 - The Sustainability Appraisal Process
 - Results of the appraisal

2. SA of the Sustainable Development Strategy for Cambridge and South Cambridgeshire to 2031

- 2.1 The National Planning Policy Framework (NPPF) emphasises that the purpose of the planning system is to contribute to the achievement of sustainable development, which is considered to have three dimensions: economic, social and environmental. According to the NPPF, these dimensions give rise to the need for planning to perform three roles:
 - an economic role contributing to building a strong, responsive and competitive economy;
 - a social role supporting strong, vibrant and healthy communities; and
 - an environmental role contributing to protecting and enhancing our natural, built and historic environment, using natural resources prudently, minimising waste and pollution and mitigating and adapting to climate change including moving to a low carbon economy.
- 2.2 The NPPF is premised on a presumption in favour of sustainable development. In the context of plan making, this means that local authorities should positively seek opportunities to meet the development needs of their area. Furthermore, local authorities should meet objectively assessed needs, unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits.
- 2.3 The NPPF requires that when drawing up or reviewing Green Belt boundaries, local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary.
- 2.4 Under the Localism Act, local authorities and other public bodies are required to work together on issues which span administrative boundaries. In this case, there is a close functional relationship between Cambridge and surrounding South Cambridgeshire, which provides most of the setting to Cambridge, but also a rural hinterland to the city including a number of significant and world leading business parks that contribute to the national as well as the Cambridge economy.
- 2.5 In light of the requirements of the NPPF to plan positively and work with neighbouring authorities, Cambridge City Council and South Cambridgeshire are working closely together to plan the future development of Cambridge. In particular, a member-based Joint Strategic Transport and Spatial Planning Group has been established

specifically to address issues affecting Cambridge and South Cambridgeshire. The Cambridgeshire Councils have also established a Joint Strategic Planning Unit to prepare a strategic spatial framework for Cambridgeshire and Peterborough, which will also help demonstrate the coordinated approach to planning for the long term needs of the wider area.

- 2.6 The development strategy for Cambridge has changed over the last two decades. In particular, before 2003 the development of Cambridge had been constrained by the presence of the Green Belt. As a result, housing development which would have taken place in Cambridge was instead dispersed to towns and villages beyond the outer boundary of the Green Belt, with people commuting back to jobs in Cambridge (with corresponding impacts on traffic congestion, air quality etc.). However, the 2003 Cambridgeshire Structure Plan signalled a change of direction, focusing development in Cambridge itself and releasing Green Belt on the edge of the City. This new approach to development was taken forward in the Cambridge Local Plan (2006) and South Cambridgeshire Local Development Framework (2007-2010) which together released significant land from the Cambridge Green Belt and allocated a number of urban extensions to the city to the south, north west, north east and east of the city. Overall, the plans introduced a step change in levels of planned growth, unmatched since the interwar years. The spatial strategy set out in the two plans is reflected in the following sequence of preference vis-à-vis the location of new development:
 - 1. Within the urban area of Cambridge;
 - 2. On the edge of Cambridge;
 - 3. In the new town of Northstowe; and
 - 4. In the market towns and the better served villages in South Cambridgeshire.
- 2.7 A 2009 evaluation of this spatial strategy identified a range of challenges for future growth. In particular, significant additional expansion to Cambridge would impact on the integrity of the Green Belt and the concept of Cambridge as a compact city. Overall, the study, which was endorsed by the Cambridgeshire authorities, recommended a continuation of the current spatial strategy and indicated that some additional longer-term growth could be located on the edge of Cambridge on the basis of a limited review of the Green Belt boundary.
- 2.8 With the review of the local plans for Cambridge and South Cambridgeshire, this an opportune moment to ask whether the spatial strategy introduced above is still applicable. In light of this, over Summer 2012, the two Councils carried out Issues and Options consultations that sought comments on whether the current development strategy remains the soundest basis for development in Cambridge and South Cambridgeshire for the period to 2031.

- 2.9 From a sustainability perspective the future sustainable development strategy will depend on the emerging economic, social and environmental evidence. From an economic perspective, the Councils recognise the role of Cambridge in the regional and national economy and the forecast job growth, which can be accommodated on already allocated employment land. From a social perspective, housing need is currently being assessed and the identified need will be taken into account in determining an appropriate spatial strategy. From an environmental perspective, the review of the Inner Green Belt boundary indicates significant vis-à-vis any further major Green Belt releases and potential compromise of the purposes of the Green Belt.
- 2.10 In light of this, it is important to recognise that further major development cannot necessarily be accommodated within Cambridge itself or the city edge. This, in turn, means that additional development, should this be necessary, would need to be accommodated within South Cambridgeshire, either within new settlements or in the most sustainable villages. This would place new homes further from the jobs in and close to Cambridge and result in less sustainable patterns of development with risks of impacts of vehicle emissions and impacts on climate change. These would need to mitigated as far as possible by providing sustainable forms of transport links to Cambridge. Given the critical nature of any decision to restrict development at the edge of Cambridge the second Issues and Options consultation seeks peoples' views on where the appropriate balance lies between protecting land on the edge of Cambridge that is of high significance to Green Belt purposes and delivering development away from Cambridge in new settlements and better served sustainable villages.

3. Green Belt Site Options

3.1 The two authorities have worked together jointly to assess the potential for further development in the Green Belt at the edge of Cambridge, and the methodology followed is explained in detail in the Part 1 Issues and Options 2013 report Chapter 9.

Identification of Reasonable Alternatives

- 3.2 The SEA Directive requires that the effects of 'reasonable alternatives' are covered. The Government's SEA Practical Guide (2006) is clear that only reasonable, realistic and relevant alternatives need to be put forward. This document suggests a hierarchy of alternatives. This hierarchical approach has been followed for the sites at the edge of Cambridge. Initially the broad locations were identified as alternatives in the Issues and Options Reports. Then more detailed boundaries within these broad locations were considered.
- 3.3 The long list of sites at the fringe of the City was developed from:
 - Developers' site boundaries received from the 'call for sites' for the Strategic Housing Land Availability Assessments (SHLAAs) carried out by both authorities.
 - Additional sites identified through the 2012 Inner Green Belt Review as fulfilling Green Belt purposes to a lesser degree.
- 3.4 This resulted in an initial list of 41 sites.

The Sustainability Appraisal Process

3.5 These sites were assessed utilising a site assessment pro forma, which was developed jointly to take into account both authorities' SA objectives. The pro forma was specifically developed to fully integrate the sustainability appraisal process into site assessment. The criteria in the pro forma take into account the social, environmental and economic sustainability themes and objectives identified in the SA Scoping Reports of both Councils. Ensuring that the criteria take into account the SA is the most effective way of ensuring that the SA is central to the appraisal of sites. In this way, the potential effects of bringing forward alternative sites for development can be thoroughly tested and compared. Consultants URS, who are carrying out the Sustainability Appraisal (SA) of the Cambridge Local Plan review, advised on the development of the joint pro forma to ensure that it meets the requirements of SA and the Strategic Environmental Assessment (SEA) Directive. The pro forma also includes planning

and deliverability criteria which do not directly relate to the SA, but are important in order to ensure that the Local Plans are deliverable.

- 3.6 The Joint Green Belt Site Assessment Pro forma can be found at Appendix 1. For each criterion there is an explanation as to which of the Cambridge SA topics and South Cambridgeshire SA objectives it relates to. A traffic light system has been used to score the sites from red red (a significant negative impact) to green green (no impact or minor impact which can be mitigated). In most cases there were three potential scores (red, amber, green), but in some cases this was extended to five categories to give a finer grained assessment. The grading range provides a means by which the relative sustainability of each site can be established in comparison with other sites.
- 3.7 The pro forma is split into two parts. The first part is a high level sieve (Level 1). It includes strategic considerations, including impact on the Green Belt, flood risk, national biodiversity and heritage designations. It also addresses key deliverability issues. This stage is effective for identifying issues that mean a site should be rejected.
- 3.8 Level 2 of the assessment considered a range of issues including accessibility to services and sustainable transport, pollution, historic environment and biodiversity.
- 3.9 Although a number of sites were considered to merit rejection following the Level 1 assessment, they were also assessed by the Level 2 criteria in order to give the most comprehensive and robust assessment possible.
- 3.10 Map 2 and Appendix 1 in the Issues & Options 2, Part 1 Joint Consultation of Development Strategy & Site Options on the Edge of Cambridge (November 2012) illustrate the site options tested.

Results of the Appraisal

3.11 The completed pro formas for all of the sites assessed can be found in the 'Technical Background Document – Part 1' at the following link:

www.cambridge.gov.uk/ccm/navigation/planning-and-buildingcontrol/planning-policy/background-documents/#

The individual site pro formas show how each site performs against the criteria that relate to the sustainability objectives.

- 3.12 In order to draw information together in an accessible form, and reach an overall conclusion on the merits of the sites assessed, key elements from the pro formas have been combined in a series of summaries by broad location which enable the most and least sustainable sites to be identified. These can be found in Appendix 2 of the Issues and Options Part 1 document.
- 3.13 Following the assessment, 6 sites have been identified as being sites with development potential, albeit with some constraints or adverse impacts (with an overall score of amber). These include two housing sites, two employment sites, one site which could be developed for either housing or employment and one which could be potentially developed for housing, employment or a community stadium. Five of these sites are located in the South of Cambridge and one is in the North of Cambridge. Four of the sites are within the Cambridge City Council boundary and two fall within South Cambridgeshire. These are the reasonable alternatives which are being consulted upon.
- 3.14 The other sites assessed have been rejected as options for development, due to either their significance to Green Belt purposes and/or for other reasons including planning constraints such as archaeological merit. Reasons for rejection are summarised in Appendix 3 of the Issues and Options Part 1 document.
- 3.15 The edge of Cambridge sites have also been assessed separately by URS in terms of the Cambridge SA objectives, and cumulatively with the other sites identified within Cambridge. This report can be found at the following link:

www.cambridge.gov.uk/options2

4. Sub-Regional Sporting, Cultural and Community Facilities

- 4.1 The two authorities have worked together jointly to assess the need and potential sites for major sporting, cultural and community facilities. The background is explained in detail in the Part 1 Issues and Options 2013 report Chapter 10.
- 4.2 Through the previous Issues and Options consultations, both Councils sought views on whether there is need for these facilities, and if there is, where they should be located (South Cambridgeshire Issues and Options Report 2012 Issue 83; Cambridge City Council Issues and Options Report 2012 Questions 11.39 to 11.41).

Community Stadium

- 4.3 Both Councils also sought views on whether there was a need for a community stadium in the sub region, and if there was, what type and size of facility it should be, and where would be the most appropriate location. (South Cambridgeshire Issues and Options Report 2012 Issue 84; Cambridge City Council Issues and options Report 2012 Option 179). Cambridge City Council also sought views on specific proposals put forward by Grosvenor Estates for a stadium near Trumpington, and redevelopment of the Abbey Stadium site for a stadium, housing or another use.
- 4.4 The option of including a stadium was assessed in the accompanying Sustainability Appraisal Reports to the Issues and Options 1 consultations. Both appraisals highlight the potential positive benefits to the economy, open space and leisure, with consequential benefits to health and community objectives. Impacts on site specific objectives or sustainable transport were uncertain, as it would depend on the location.
- 4.5 Following this consultation, the Councils have reviewed the evidence available, to explore whether there is a need for a community stadium and what a community stadium would encompass. The Cambridge Sub Regional Facilities Review (November 2012) has been published alongside the Issues and Options 2013 consultation. Following this review, it was decided to consult again on the issue of need for a community stadium, and the principles that could form part of a vision for a community stadium.

- 4.6 The principles for a community stadium identified at paragraph 10.7 of the Consultation document would confirm the potential benefits highlighted by the previous sustainability appraisals.
- 4.7 The Review concludes that no specific objective need can be quantified requiring the provision of a community stadium. However, the Review identifies that the right package of uses in a suitable location could deliver benefits for the wider sub-region. In the light of the latest work, the consultation asks whether there is considered to be a need to plan for a community stadium.

Identification of Reasonable Alternatives for Community Stadium Site

- 4.8 Following the first Issues and Options consultation, the Councils have explored the potential of a range of site options to provide a community stadium as part of the Cambridge Sub-Regional Facilities Review, including a number of sites that were suggested in responses to the consultation. The identification of potential site options is detailed in 'The Cambridge Sub Regional Facilities Review' (November 2012). This identified potential site options within the built up area of Cambridge, on the edge of Cambridge (in the Green Belt), and outside Cambridge. Details of site options considered but rejected before detailed assessment can be found in Appendix 2 of this document. Following this initial review, 11 options were identified for more detailed assessment.
 - Abbey Stadium site, Newmarket Road, Cambridge
 - Abbey Stadium site plus allotment land to the south
 - Land east of Norman Way Business Park, Coldham's Lane Cambridge
 - Cowley Road, Cambridge
 - Cambridge East North of Newmarket Road
 - Land between Milton and Impington (Leonard Martin Union Place)
 - West of Cambridge Road South of the A14, Impington
 - South of Trumpington Meadows (Grosvenor / Wrenbridge proposal)
 - Northstowe
 - Waterbeach New Town Option
 - Bourn Airfield

The Sustainability Appraisal Process

4.9 Similar to the Green Belt site review above, sites were assessed utilising a site assessment pro forma, which was developed jointly to take into account both authorities' SA objectives. The pro forma was specifically developed to fully integrate the SA process into site assessment, and consider particular issues relevant to a community

stadium. The development of the pro forma is documented in section 5 of the Cambridge Sub Regional Facilities Review (November 2012).

- 4.10 The Joint Community Stadium Site Assessment Pro forma can be found at Appendix 2 of this report. For each criterion there is an explanation as to which of the Cambridge SA topics and South Cambridgeshire SA objectives it relates to. A traffic light system has been used to score the sites from red red (a significant negative impact) to green green (no impact or minor impact which can be mitigated). In most cases there were three potential scores (red, amber, green), but in some cases this was extended to five categories to give a finer grained assessment.
- 4.11 Again the assessment has been split into three levels. The first addresses strategic and infrastructure issues, the second site considerations, and thirdly availability and deliverability. A conclusion is then identified for each level, whether there are significant constraints, some constraints, or only minor constraints or adverse impacts. There is then an overall conclusion, identifying the level of constraints that have been identified.

Results of the Appraisal

- 4.12 The detailed assessment resulted in rejection of two options (the existing Abbey Stadium Site, Land east of Norman Way Business Park). Nine sites were considered to merit consultation, although there are major issues associated with all site options and this may mean that some sites may not be capable of being delivered. It is considered appropriate to consult on these options at this stage in the process before any decisions are taken on whether a community stadium should be provided and if so where. The view of the local community is an important step in the process.
- 4.13 The site assessments can be found in the Cambridge Sub Regional Facilities Review (November 2012) at the following link:

www.cambridge.gov.uk/ccm/navigation/planning-and-buildingcontrol/planning-policy/background-documents/#

Ice Rink and Concert Hall Options

4.14 The previous Issues and Options consultations sought views on whether there was a need for an ice rink or concert hall, and if so where they should be located. Again the option of including these facilities was assessed in the accompanying Sustainability Appraisal Reports. Both appraisals highlight the potential positive benefits to the economy, open space and leisure, with consequential benefits to health and community objectives. Impacts on site specific objectives or sustainable transport were uncertain as it would depend on the location.

- 4.15 The Cambridge Sub Regional Facilities Review (November 2012) considered the evidence of need for these facilities, Given the limited evidence available at this stage, instead of allocating a specific site, the Local Plans could include a general policy that would provide a framework for considering any proposals for sub-regional facilities, so that should proposals come forward they can be appropriately considered. Potential policy principles are included in paragraph 10.17 of the Part 1 Issues and Options 2013.
- 4.16 The principles focus on sustainable access, community safety, and creating a high quality public realm. Such a policy would assist the achievement of positive impacts on a range of South Cambridgeshire Sustainability objectives for creating good spaces, human health, crime, sustainable travel and transport infrastructure. Similarly, there would be positive outcomes for a number of Cambridge Sustainability Appraisal themes, including communities and wellbeing, Landscape, townscape and cultural heritage, economy, and transport

site forward for	plan period)	
development?	A = Start of construction	
	between 2017 and 2031	
	G = Start of construction	
Would development of the	between 2011 and 2016 R = Yes, significant	Not an SA matter
site require significant new	upgrades likely to be	
/ upgraded utility	required but constraints	South Cambridgeshire
infrastructure?	incapable of appropriate	Sustainability Objective:
	mitigation	21. Support appropriate
	A = Yes, significant	investment in people,
	upgrades likely to be	places, communications and other infrastructure
	required, constraints capable of appropriate	
	mitigation	
		1

Would development of the site be likely to require new education provision?	G = No, existing infrastructure likely to be sufficient R = School capacity not sufficient, constraints cannot be appropriately mitigated. A = School capacity not sufficient, constraints can be appropriately mitigated G = Non-residential development / surplus school places	Not an SA matter South Cambridgeshire Sustainability Objective: 20. Help people gain access to satisfying work appropriate to their skills, potential and place of residence
Is the site allocated or safeguarded in the Minerals and Waste LDF?	R = Site or a significant part of it falls within an allocated or safeguarded area, development would have significant negative impacts A = Site or a significant part of it falls within an allocated or safeguarded area, development would have minor negative impacts G = Site is not within an allocated or safeguarded area.	Not an SA matter South Cambridgeshire Sustainability Objective: 21. Minimise the irreversible loss of undeveloped land, economic mineral reserves, and productive agricultural holdings and the degradation / loss of soils
Is the site located within the Cambridge Airport Public Safety Zone (PSZ) or Safeguarding Zone?	R = Site is within the PSZ or is designated as an area where no development should occur A = Site or part of site within the SZ G = Site is not within the PSZ or SZ	Not an SA matter

Level 2			
Accessibility to existing c	entres and services		
Criteria	Performance	Links to Cambridge SA Topics and South Cambridgeshire Sustainability Objectives	
How far is the site from the nearest District or Local centre?	R = >800m A = 400-800m G = <400m	Cambridge SA topic: Communities and well being South Cambridgeshire Sustainability Objective: 22. Reduce the need to travel and promote more sustainable transport choices.	

How far is the nearest health centre or GP service in Cambridge?	R = >800m A = 400-800m G = <400m	Cambridge SA topic: Communities and well being
		South Cambridgeshire Sustainability Objective: 22. Reduce the need to travel and promote more sustainable transport choices.
Would development lead to a loss of community facilities?	R = Development would lead to the loss of one or more community facilities incapable of appropriate	Cambridge SA topic: Communities and well being
	mitigation G = Development would not lead to the loss of any community facilities or appropriate mitigation possible	South Cambridgeshire Sustainability Objective: 16. Improve the quality, range and accessibility of services and facilities (e.g. health, transport, education, training, leisure opportunities)
How well would the development on the site integrate with existing communities?	R = Limited scope for integration with existing communities / isolated and/or separated by non-	Cambridge SA topic: Communities and well being
communities?	residential land uses A = Adequate scope for integration with existing communities G = Good scope for integration with existing communities / of sufficient scale to create a new community.	South Cambridgeshire Sustainability Objective: 18. Encourage and enable the active involvement of local people in community activities
How far is the nearest secondary school?	R = >3km A = 1-3km G = <1km or non-housing allocation or site large	Cambridge SA topic: Communities and well being
	enough to provide new school	South Cambridgeshire Sustainability Objective: 16. Improve the quality, range and accessibility of services and facilities (e.g. health, transport, education, training, leisure opportunities)
How far is the nearest primary school?	City preference: R = >800m	Cambridge SA topic: Communities and well being
	A = 400-800m G = <400m or non- housing allocations or site	South Cambridgeshire Sustainability Objective:

	large enough to provide new school SCDC: R = >3km A = 1-3 km G = <1km or non housing allocation or site large enough to provide new school	16. Improve the quality, range and accessibility of services and facilities (e.g. health, transport, education, training, leisure opportunities)
Would development protect the shopping hierarchy, supporting the vitality and viability of Cambridge, Town, District and Local Centres?	R = Significant negative effect A = Negative effect G = No effect or would support the vitality and viability of existing centres	Cambridge SA topics: - Communities and well being - Economy South Cambridgeshire Sustainability Objective: 19. Improve the efficiency, competitiveness, vitality and adaptability of the local economy.
Accessibility to outdoor fa	cilities and green spaces	
Criteria	Performance	Links to Cambridge SA Topics and South Cambridgeshire Sustainability Objectives
Would development result in the loss of land protected by Cambridge Local Plan policy 4/2 or South Cambridgeshire Development Control policy SF/9? (excluding land which is protected only because of its Green Belt status).	R=Yes G=No	Cambridge SA topics: - Communities and Well Being - Landscape, townscape and cultural heritage - Biodiversity and green infrastructure South Cambridgeshire Sustainability Objective: 14. Improve the quantity and quality of publicly accessible open space.
If the site is protected open space can the open space be replaced according to CLP Local Plan policy 4/2 Protection of Open Space or South Cambridgeshire Development Control policy SF/9 (for land in South Cambridgeshire)?	R=No G=Yes	Cambridge SA topics: - Communities and Well Being - Landscape, townscape and cultural heritage - Biodiversity and green infrastructure South Cambridgeshire Sustainability Objective: 14. Improve the quantity

Γ		accessible open space
If the site does not involve any protected open space would development of the site be able to increase the quantity and quality of publically accessible open space / outdoor sports facilities and achieve the minimum standards of onsite public open space (OS) provision?	RR = No, the site by virtue of its size is not able to provide the minimum standard of OS and is located in a ward or parish with identified deficiency. R= No, the site by virtue of its size is not able to provide the minimum standard of OS. G = Assumes minimum on-site provision to adopted plan standards is provided onsite GG = Development would create the opportunity to deliver significantly enhanced provision of new public open spaces in excess of adopted plan standards.	accessible open space. Cambridge SA topics: - Communities and Well Being - Landscape, townscape and cultural heritage - Biodiversity and green infrastructure South Cambridgeshire Sustainability Objective: 14. Improve the quantity and quality of publicly accessible open space.
Supporting Economic Gro		
Criteria	Performance	Links to Cambridge SA Topics and South Cambridgeshire Sustainability Objectives
How far is the nearest main employment centre?	R = >3km A = 1-3km G = <1km or allocation is for or includes a significant element of employment or is for another non- residential use	Cambridge SA topic: Economy South Cambridgeshire Sustainability Objective:.20. Help people gain access to satisfying work appropriate to their skills, potential and place of residence
Would development result in the loss of employment land identified in the Employment Land Review?	R = Significant loss of employment land and job opportunities not mitigated by alternative allocation in the area (> 50%) A = Some loss of employment land and job opportunities mitigated by alternative allocation in the area (< 50%). G = No loss of employment land / allocation is for employment development	Cambridge SA topic: Economy South Cambridgeshire Sustainability Objective:. 19. Improve the efficiency, competitiveness, vitality and adaptability of the local economy.
Would allocation result in development in deprived areas of Cambridge?	A = Not within or adjacent to the 40% most deprived Super Output Areas within	Cambridge SA topic: Economy

	Cambridge according to	South Cambridgeshire
	the Index of Multiple Deprivation 2010. G = Within or adjacent to the 40% most deprived Local Super Output Areas (LSOA) within Cambridge according to the Index of Multiple Deprivation 2010.	Sustainability Objective:.20. Help people gain access to satisfying work appropriate to their skills, potential and place of residence
Sustainable Transport	F	
Criteria	Performance	Links to Cambridge SA Topics and South Cambridgeshire Sustainability Objectives
What type of public transport service is accessible at the edge of the site?	R = Service does not meet the requirements of a high quality public transport (HQPT)	Cambridge SA topic: Transport South Cambridgeshire
	(Fight 1) A = service meets requirements of high quality public transport in most but not all instances G = High quality public transport service	Sustainability Objective: 22. Reduce the need to travel and promote more sustainable transport choices.
How far is the site from an existing or proposed train station?	R = >800m A = 400 - 800m G = <400m	Cambridge SA topic: Transport
		South Cambridgeshire Sustainability Objective: 22. Reduce the need to travel and promote more sustainable transport choices.
What type of cycle routes are accessible near to the	RR = no cycling provision and traffic speeds >30mph	Cambridge SA topic: Transport
site?	with high vehicular traffic volume. R = No cycling provision or a cycle lane less than 1.5m width with medium volume of traffic. Having to cross a busy junction with high cycle accident rate to access local facilities/school. Poor quality off road path. A = Medium quality off- road path. G = Quiet residential street speed below 30mph, cycle lane with 1.5m minimum width, high quality off-road	South Cambridgeshire Sustainability Objective: 22. Reduce the need to travel and promote more sustainable transport choices.

SCDC Would development reduce the need to travel and promote sustainable transport choices: SCDC Sub-indicator: Distance to a bus stop / rail station	path e.g. cycleway adjacent to guided busway. GG = Quiet residential street designed for 20mph speeds, high quality off- road paths with good segregation from pedestrians, uni- directional hybrid cycle lanes. RR = Score 0-4 from 4 criteria below R = Score 5-9 from 4 criteria below A = Score 10-14 from 4 criteria below G = Score 15-19 from 4 criteria below GG = Score 19-24 from 4 criteria below Within 400m (6) Within 600m (4) Within 800m (3) Within 1000m (2) Beyond 1000m (0)	Cambridge SA topic: Transport South Cambridgeshire Sustainability Objective: 22. Reduce the need to travel and promote more sustainable transport choices. Cambridge SA topic: Transport South Cambridgeshire Sustainability Objective: 22. Reduce the need to travel and promote more sustainable transport choices.
SCDC Sub-indicator: Frequency of Public Transport	10 minute service or better (6) 20 minute service (4) 30 minute service (3) 60 minute service (2) Less than hourly service (0)	Cambridge SA topic: Transport South Cambridgeshire Sustainability Objective: 22. Reduce the need to travel and promote more sustainable transport choices.
SCDC Sub-Indicator: Typical public transport journey time to Cambridge City Centre	20 minutes or less (6) Between 21 and 30 minutes (4) Between 31 and 40 minutes (3) Between 41 and 50 minutes (2) Greater than 50 minutes (0)	Cambridge SA topic: Transport South Cambridgeshire Sustainability Objective: 22. Reduce the need to travel and promote more sustainable transport choices.
SCDC Sub-indicator: Distance for cycling to City Centre	Up to 5km (6) 5-10km (4) 10-15km (3)	Cambridge SA topic: Transport

	15km + (2) 20km + (0)	South Cambridgeshire Sustainability Objective:
		22. Reduce the need to travel and promote more sustainable transport choices.
Air Quality, pollution, con	tamination and noise	
Criteria	Performance	Links to Cambridge SA Topics and South Cambridgeshire Sustainability Objectives
Is the site within or near to an AQMA, the M11 or the A14?	R = Within or adjacent to an AQMA, M11 or A14 A = <1000m of an AQMA, M11 or A14	Cambridge SA topic: Communities and well being
	G = >1000m of an AQMA, M11, or A14	South Cambridgeshire Sustainability Objective: 3. Improve air quality and minimise or mitigate against sources of environmental pollution.
Would the development of the site result in an adverse impact/worsening of air quality?	R = Significant adverse impact A = Adverse impact G = Minimal, no impact,	Cambridge SA topic: Communities and well being
	reduced impact	South Cambridgeshire Sustainability Objective: 3. Improve air quality and minimise or mitigate against sources of environmental pollution.
Are there potential noise and vibration problems if the site is developed, as a receptor or generator?	R = Significant adverse impacts incapable of appropriate mitigation A = Adverse impacts	Cambridge SA topic: Communities and well being
	capable of adequate mitigation G = No adverse effects or capable of full mitigation	South Cambridgeshire Sustainability Objective: 3. Improve air quality and minimise or mitigate against sources of environmental pollution.
Are there potential light pollution problems if the site is developed, as a receptor or generator?	R = Significant adverse impacts incapable of appropriate mitigation A = Adverse impacts	Cambridge SA topic: Communities and well being
	capable of adequate mitigation G = No adverse effects or capable of full mitigation	South Cambridgeshire Sustainability Objective: 3. Improve air quality and minimise or mitigate against sources of

	[
		environmental pollution.
Are there potential odour problems if the site is developed, as a receptor or generator?	R = Significant adverse impacts incapable of appropriate mitigation A = Adverse impacts capable of adequate mitigation G = No adverse effects or capable of full mitigation	Cambridge SA topic: Communities and well being South Cambridgeshire Sustainability Objective: 3. Improve air quality and minimise or mitigate against sources of environmental pollution.
Is there possible contamination on the site?	R = All or a significant part of the site within an area with a history of contamination which, due to physical constraints or economic viability, is incapable of appropriate mitigation during the plan period A = Site partially within or adjacent to an area with a history of contamination, or capable of remediation appropriate to proposed development G = Site not within or adjacent to an area with a history of contamination	Cambridge SA topic: Communities and well being South Cambridgeshire Sustainability Objective: 3. Improve air quality and minimise or mitigate against sources of environmental pollution.
Protecting Groundwater		
Criteria	Performance	Links to Cambridge SA Topics and South Cambridgeshire Sustainability Objectives
Would development be within a source protection zone? Groundwater sources (e.g. wells, boreholes and springs) are used for public drinking water supply. These zones show the risk of contamination from any activities that might cause pollution in the area.	R = Within SPZ 1 G = Not within SPZ1 or allocation is for greenspace	Cambridge SA topic: Water South Cambridgeshire Sustainability Objective: 3. Improve air quality and minimise or mitigate against sources of environmental pollution
Protecting the townscape and historic environment (Landscape addressed by Green Belt criteria)		
Criteria	Performance	Links to Cambridge SA Topics and South Cambridgeshire Sustainability Objectives

Would allocation impact upon a historic park/garden?	R = Site contains, is adjacent to, or within the setting of such areas with potential for significant negative impacts incapable of appropriate mitigation A = Site contains, is adjacent to, or within the setting of such areas with potential for negative impacts capable of appropriate mitigation G = Site does not contain or adjoin such areas, and there is no impact to the setting of such areas	Cambridge SA topic: Landscape, townscape and cultural heritage South Cambridgeshire Sustainability Objective: 8. Avoid damage to areas and sites designated for their historic interest, and protect their settings.
Would development	R = Site contains, is	Cambridge SA topic:
impact upon a Conservation Area?	R = Site contains, is adjacent to, or within the setting of such an area with potential for significant negative impacts incapable of appropriate mitigation A = Site contains, is adjacent to, or within the setting of such an area with potential for negative impacts capable of appropriate mitigation G = Site does not contain or adjoin such an area, and there is no impact to the setting of such an area	Cambridge SA topic: Landscape, townscape and cultural heritage South Cambridgeshire Sustainability Objective: 8. Avoid damage to areas and sites designated for their historic interest, and protect their settings.
Would development	A = Site contains, is	Cambridge SA topic:
impact upon buildings of local interest (Cambridge only)	adjacent to, or within the setting of such buildings with potential for negative impacts capable of	Landscape, townscape and cultural heritage South Cambridgeshire
	appropriate mitigation G = Site does not contain or adjoin such buildings, and there is no impact to the setting of such buildings	South Cambridgeshire Sustainability Objective: 8. Avoid damage to areas and sites designated for their historic interest, and protect their settings.
Would development impact upon archaeology?	A = Known archaeology on site or in vicinity G=No known archaeology on site or in vicinity	Cambridge SA topic: Landscape, townscape and cultural heritage
		South Cambridgeshire Sustainability Objective: 8. Avoid damage to areas and sites designated for their

		historic interest, and protect their settings.
Making Efficient Use of La	nd	
Criteria	Performance	Links to Cambridge SA Topics and South Cambridgeshire Sustainability Objectives
Would development lead to the loss of the best and most versatile agricultural land?	R = Significant loss (20 ha or more) of grades 1 and 2 land A = Minor loss of grade 1 and 2 land G = Neutral. Development would not affect grade 1 and 2 land.	Cambridge SA topic: Communities and well being South Cambridgeshire Sustainability Objective: 1. Minimise the irreversible loss of undeveloped land, economic mineral reserves, and productive agricultural holdings and the degradation / loss of soils.
Would development make use of previously developed land (PDL)? (CITY)	R = No G = Yes	Cambridge SA topic: Communities and well being South Cambridgeshire Sustainability Objective: 1. Minimise the irreversible loss of undeveloped land, economic mineral reserves, and productive agricultural holdings and the degradation / loss of soils.
Would development make use of previously developed land (PDL)? (SCDC)	A=No G=Yes	Cambridge SA topic: Communities and well being South Cambridgeshire Sustainability Objective: 1. Minimise the irreversible loss of undeveloped land, economic mineral reserves, and productive agricultural holdings and the degradation / loss of soils.
Biodiversity and Green Infrastructure		
Criteria	Performance	Links to Cambridge SA Topics and South Cambridgeshire Sustainability Objectives
Would development impact upon a locally designated	R = Contains or is adjacent to an existing	Cambridge SA topic: Biodiversity and green

wildlife site i.e. (Local Nature Reserve, County Wildlife Site, City Wildlife Site)site and impacts incapabele of appropriate mitigation A = Contains or is adjacent to an existing site and impacts capable of appropriate mitigation G = Does not contain, is not adjacent to or local area will be developed as greenspaceinfrastructureSouth Cambridgeshire Sustainability Objective: Sustainability Objective: South Cambridgeshire Sustainability Objective: Sustainability Objective: Sustainability Objective: Sustainability Objective: Sustainability Objective: Sustainability Objective: Sustainability Objective: Sustainability Objective: Sustainability Objective: Sustainability Objective: South Cambridgeshire Sustainability Objective: South Cambridgeshire Sustainability Objective: South Cambridgeshire Sustainability Objective: South Cambridgeshire Sustainability Objective: South Cambridgeshire Sustainability of characteristic habitats and species.Would development radive species, and help deliver habitat restoration (helping to achieve Biodiversity Acton Plan targets?)R = Development would have a negative impact on existing features or network links R = Development would have a positive impact on the protected trees incapable of appropriate mitigation G =		1	1
opportunity for green infrastructure delivery?involves a loss of existing green infrastructure which is incapable of appropriate mitigation. A = No significant opportunities or loss of existing green infrastructure capable of appropriate mitigation G = Development could deliver significant new green infrastructureBiodiversity and green infrastructure South Cambridgeshire Sustainability Objective: 5.Maintain and enhance the range and viability of characteristic habitats and species.Would development reduce habitat fragmentation, enhance native species, and help deliver habitat restoration (helping to achieve targets?)R = Development would have a negative impact on existing features or network links but capable of appropriate mitigation G = Development could have a negative impact on existing features or network links but capable of appropriate mitigation G = Development could have a positive impact by enhancing existing features and adding new features or network linksCambridge SA topic: Biodiversity and green infrastructureAre there trees on site or immediately adjacent protected by a Tree Preservation Order (TPO)?R = Development likely to have a significant adverse impact on they a significant adverse impact on protected trees capable of appropriate mitigation G = Site does not contain or adjoin any protected treesCambridge SA topics: - Biodiversity and green infrastructureAre there trees on site or immediately adjacent protected trees incapable of appropriate mitigation C = Site does not contain or adjoin any protected treesCambridge SA topics: - Biodiversity and green infrastructureSouth Cambridgeshire <br< td=""><td>Wildlife Site, City Wildlife Site)</td><td>mitigation A = Contains or is adjacent to an existing site and impacts capable of appropriate mitigation G = Does not contain, is not adjacent to or local area will be developed as greenspace</td><td>Sustainability Objective: 5.Maintain and enhance the range and viability of characteristic habitats and species.</td></br<>	Wildlife Site, City Wildlife Site)	mitigation A = Contains or is adjacent to an existing site and impacts capable of appropriate mitigation G = Does not contain, is not adjacent to or local area will be developed as greenspace	Sustainability Objective: 5.Maintain and enhance the range and viability of characteristic habitats and species.
reduce habitat fragmentation, enhance native species, and help deliver habitat restoration (helping to achieve Biodiversity Action Plan targets?)have a negative impact of appropriate mitigation A = Development would have a negative impact on existing features or network links but capable of appropriate mitigation G = Development could have a positive impact by enhancing existing features or network linksBiodiversity and green infrastructureAre there trees on site or immediately adjacent protected by a TreeR = Development likely to have a significant adverse impact on protected trees infrastructureCambridge SA topics: - Biodiversity and green infrastructurePreservation Order (TPO)?R = Development likely to have a significant adverse impact on the protected trees incapable of appropriate mitigation A = Any adverse impact on protected trees capable of appropriate mitigation G = Site does not contain or adjoin any protected treesCambridge SA topics: - Biodiversity and green infrastructureSouth Cambridgeshire Sustainability Objective: 5. Level 1 Conclusion (after allowing scope for mitigation)	R = Significant constraints or adverse impacts A = Some constraints or adverse impacts G = Minor constraints or adverse impacts	
Level 2 Conclusion (after allowing scope for mitigation)	R = Significant constraints or adverse impacts A = Some constraints or adverse impacts G = Minor constraints or adverse impacts	
Overall Conclusion	R = Site with no significant development potential (significant constraints and adverse impacts) A = Site with development potential (some constraints or adverse impacts) G = Site with development potential (few or minor constraints or adverse impacts)	
Viability feedback (from consultants)	R = Unlikely to be viable, A = May be viable G = Likely to be viable	

Table 2: Links between Joint Green Belt Site Pro forma and CambridgeSustainability Appraisal Topics

	ıbridge Sustainability raisal Topic	Joint Green Belt Testing Criteria
		Joint Green Belt Testing Criteria How far is the site from the nearest District or Local centre? How far is the nearest health centre or GP service in Cambridge? Would development lead to a loss of community facilities? How well would the development on the site integrate with existing communities? How far is the nearest secondary school? How far is the nearest primary school? Would development protect the shopping hierarchy, supporting the vitality and viability of Cambridge, Town, District and Local Centres? Would development result in the loss of protected open space (protected by Cambridge Local Plan policy 4/2 or South Cambridgeshire Development Control policy SF/9) (excluding land which is protected only because of its Green Belt status)? Would development of the site be able to increase the quantity and quality of publically accessible open space / outdoor sports facilities and achieve the minimum standards of onsite public open space (OS) provision? Is the site within or near to an AQMA, the M11 or the A14?
		Would the development of the site result in an adverse impact/worsening of air quality? Are there potential noise and vibration problems if the site is developed, as a receptor or generator? Are there potential light pollution problems if the site is developed, as a receptor or generator? Are there potential odour problems if the site is developed, as a receptor or generator?
		Is there possible contamination on the site? Would development lead to the loss of the best and most versatile agricultural land? Would development make use of previously developed land? Would allocation result in development in deprived areas of Cambridge?
2	Economy	Would development protect the shopping hierarchy, supporting the vitality and viability of Cambridge, Town, District and Local Centres? How far is the nearest main employment centre? Would development result in the loss of employment land identified in the Employment Land Review? Would allocation result in development in deprived areas of Cambridge?
3	Transport	What type of public transport service is accessible at the edge of the site? How far is the site from an existing or proposed train station? What type of cycle routes are accessible near to the site? Would development reduce the need to travel and

		promote sustainable transport choices?
4	Water	Would development be within a source protection zone?
5	Flood risk including climate change adaptation	Is site within a flood zone? Is site at risk from surface water flooding?
6	Climate change mitigation and renewable energy	N/A No criteria have been developed for this, as the information is not available at site allocation stage. These objectives will be addressed through the development and inclusion of policies in the Local Plan relating to sustainable construction standards and on- site carbon emissions reductions.
7	Landscape, townscape and cultural heritage	 What effect would the development of this site have on Green Belt purposes, and other matters important to the special character of Cambridge and setting? Will allocation impact upon a Scheduled Ancient Monument (SAM)? Would development impact upon Listed Buildings? Would development result in the loss of protected open space (protected by Cambridge Local Plan policy 4/2 or South Cambridgeshire Development Control policy SF/9) (excluding land which is protected only because of its Green Belt status)? Would development of the site be able to increase the quantity and quality of publically accessible open space / outdoor sports facilities and achieve the minimum standards of onsite public open space (OS) provision? Would allocation impact upon a historic park/garden? Would development impact upon a Conservation Area? Would development impact upon archaeology? Are there trees on site or immediately adjacent protected by a Tree Preservation Order (TPO)?
8	Biodiversity and green infrastructure	Would allocation impact upon a Site of Special Scientific Interest (SSSI)? Would development result in the loss of protected open space (protected by Cambridge Local Plan policy 4/2 or South Cambridgeshire Development Control policy SF/9) (excluding land which is protected only because of its Green Belt status)? Would development of the site be able to increase the quantity and quality of publically accessible open space / outdoor sports facilities and achieve the minimum standards of onsite public open space (OS) provision? Would development impact upon a locally designated wildlife site i.e. (Local Nature Reserve, County Wildlife Site, City Wildlife Site)? Does the site offer opportunity for green infrastructure delivery? Would development reduce habitat fragmentation, enhance native species, and help deliver habitat restoration (helping to achieve Biodiversity Action Plan targets?) Are there trees on site or immediately adjacent protected by a Tree Preservation Order (TPO)?

	R = New Town	a sequential approach needs

· · · · · · · · · · · · · · · · · · ·		to be demonstrated
	RR = Village	to be demonstrated.
		South Cambridgeshire Sustainability Objective: 16. Improve the quality, range and accessibility of services and facilities (e.g. health, transport, education, training, leisure opportunities)
Flood Risk		
Criteria	Performance	Comments / Links to Sustainability Objectives
Is site within a flood zone?	RR = Flood risk zone 3b A = Flood risk zone 3 G = Flood risk zone 2 GG = Flood risk zone 1	Identifies the fluvial flood risk of the site, using the Strategic Flood Risk Assessment.
		The National Planning Policy Framework requires a sequential approach to development, seeking land at lowest risk first. Development in zone 3a would require exception test if included medical or educational uses.
		South Cambridgeshire Sustainability Objective: 11. Reduce vulnerability to future climate change effects.
		Cambridge SA topic: Flood risk including climate change adaptation.
Is site at risk from surface water flooding?	A= High risk, G = Medium risk GG= Low risk	Information form Surface Water Management plans. Takes account of scope for appropriate mitigation, which could reduce the level of risk on site and potentially reduce flood risk elsewhere (for example from site run-off).
		South Cambridgeshire Sustainability Objective: 11. Reduce vulnerability to future climate change effects.
		Cambridge SA topic: Flood risk including climate change adaptation.
Green Belt		
Criteria	Performance	Comments / Links to Sustainability Objectives
Is the site in the Green Belt?	If yes, complete section below.	Not all sites being tested are located in the Green Belt
What effect would the development of this site have on Green Belt purposes, and other matters important to the	See below	The purposes of the Green Belt were defined in the South Cambridgeshire Core Strategy, drawing on the

anacial character of		Groop Datt Study 2002
special character of Cambridge and setting?		Green Belt Study 2002.
Cambridge and county.		The review of impact on Green Belt purposes has been completed with assistance from landscape architects. This will draw on the findings of the Inner Green Belt Study 2012.
		South Cambridgeshire Sustainability Objective: 7. Maintain and enhance the diversity and distinctiveness of landscape and townscape character
		Cambridge SA topic: Landscape, townscape and cultural heritage
To preserve the unique character of Cambridge as a compact and dynamic City with a thriving historic core	Distance from edge of the defined City Centre in Kilometres to approximate centre of site	
To prevent communities in the environs of Cambridge from merging into one another and with the City.	$\begin{array}{llllllllllllllllllllllllllllllllllll$

		location.
		Also considered in ability to form part of a community criteria.
10	Minimise impacts on climate change (including greenhouse gas emissions)	N/A
		Impacts on air quality, and sustainable transport addressed separately.
11	Reduce vulnerability to future climate change effects	Is site within a flood zone? Is site at risk from surface water flooding?
12	Maintain and enhance human health	
		To avoid repetition this indicator will not be applied at a site comparison level. There are a range of other indicators relate to human health, including environmental issues (air quality and other forms of pollution), access to services and facilities, safe transport access and opportunities to use alternative transport modes, access to open space and Green Infrastructure.
13		N/A Impacted by a range of factors, including in particular transport arrangements.
14	Improve the quantity and quality of publically accessible open space.	Would development result in the loss of land protected by Cambridge Local Plan (CLP) policy 4/2 or South Cambridgeshire Development Control policy SF/9? If the site is protected open space, would the loss or replacement of the open space be consistent with CLP Local Plan policy 4/2 Protection of Open Space or with South Cambridgeshire Development Control policy SF/9 If the site does not involve any protected open space would development of the site be able to increase the quantity and quality of publically accessible open space / outdoor sports facilities and achieve the minimum standards of onsite public open space (OS) provision?
15	Ensure everyone has access to decent, appropriate and affordable housing	N/A Housing options have been tested separately.
16		
17	Redress inequalities related to age, disability, gender	
18	Encourage and enable the active involvement of local people in community activities	Would development lead to a loss of community
19		Would development result in the loss of employment land identified in the Employment Land Review?
20	Help people gain access to satisfying work appropriate to	N/A Addressed by accessibility criteria.

21	Support appropriate investment in people, places, communications and other infrastructure	
22	promote more sustainable	What type of public transport service is accessible at the edge of the site? How far is the site from an existing or proposed train station? What type of cycle routes are accessible near to the site? Would development reduce the need to travel and promote sustainable transport choices?
23	and development in transport infrastructure, and ensure the safety of the transport network.	Is the site located within the Cambridge Airport Public Safety Zone (PSZ) or Safeguarding Zone? Is there a suitable access to the site? Would allocation of the site have a significant impact on the local highway capacity? Would allocation of the site have a significant impact on the strategic road network capacity?
