LOCAL GREEN SPACES IN HISTON & IMPINGTON

INFORMATION ON SITE: "Greenleas (Farmstead Close) Community Space"

Version 14 May 2019

INTRODUCTION

This template is for the compilation of information relevant to the designation of a particular site as a Local Green Space (LGS) in the Histon & Impington Neighbourhood Plan. It serves to inform decisions about LGS designation, to provide supporting evidence to the District planning authorities and to inform specific policies and management plans for the site. It is based on the requirements of the National Planning Policy Framework and South Cambridgeshire Local Plan and draws on other guidance documents, as explained in the Histon and Impington LGS Framework paper. It is organised into sections, as listed below, but most sites will be significant for only a couple of the criteria covered.

- 1. General Information
- 2. Planning history and legal status
- 3. Size, scale and "local nature"
- 4. Need for and proximity/accessibility of Local Green Space
- 5. Evidence that it "is demonstrably special to a local community"
- 6. Evidence that it "holds particular local significance for its beauty or tranquillity"
- 7. Evidence that it "holds particular local significance for its historical or cultural value"
- 8. Evidence that it "holds particular local significance for its recreational value"
- 9. Evidence that it "holds particular local significance for the richness of its wildlife"
- 10. Evidence that it holds particular local significance for other ecosystem services
- 11. Evidence about the site's connectivity to other green areas for ecological or recreational purposes
- 12. Evidence that the green space holds particular local significance for any other reason

REFERENCE NUMBER OF THIS CANDIDATE LOCAL GREEN SPACE = V3

WORKING NAME OF THIS LOCAL GREEN SPACE = Greenleas (Farmstead Close) Community Space

DATE of most recent amendment / addition to the dossier = 14 May 2019

IN A NUTSHELL (max 100 words), the case for this Local Green Space:

The provision of open communal space for amenity use was integral to the vision for the Greenleas estate community and since its construction has been reinforced through legal instruments protecting the open spaces from development. The open space, crossed by Parlour Close, is both at the heart of the estate and located where many residents pass daily. It has especial value as a place for informal children's and young adult's games, close to homes. With its well-maintained trees, grass and hedge, it creates a safe, pleasing and uplifting environment for the whole community, young and old to enjoy.

1	GENERAL INFORMATION	
1.1	Name(s) and location/address of site. Some sites have several names, in which case mention all known names.	
	Greenleas (Farmstead Close) Community Space. Contiguous open green spaces within the Greenleas estate, alongside Farmstead Close, either side of Parlour Close and abutting Burkett Way.	Whilst not directly relevant, on an internet search it appears that land on the east side of Narrow close is also owned by GEM Ltd. I think this runs alongside Glebe Way. www.suite.endole.co.uk
1.2	Site location map(s) and photographs The plan can be at any scale but must show location and boundaries of the site. Indicate the scale. Add explanatory text about site location and boundaries in box below.	Has a map been provided? YES Have photos been provided? YES Attach the map(s) and photo(s) separately.
	Contiguous open green spaces (grass, hedges and trees) within the body of Greenleas estate, alongside Farmstead Close, either side of Parlour Close and abutting Burkett Way.	
1.3	Ownership of site Information on land ownership can be obtained from the <i>Land Registry</i> or local knowledge.	
	Greenleas Estate Management Ltd owns and maintains the communal "amenity" land.	www.suite.endole.co.uk www.facebook.com>greenleasestate. Denis Payne did a brief search and found for sure that part of the site (abutting Burkett Way) was owned by GEM. It was assumed the remainder was similarly owned.
1.4	Is the owner aware of the potential designation as LGS? Do they support the designation? Support is highly desirable, but it is possible for a site to be designated as a LGS, even if there are objections from the site owners.	
	The proposal has been discussed with a director of Greenleas Estate Management Ltd (GEM - a successor to the Greenleas Residents Association) who noted informally the land is held as an open area for communal use under a trust deed arrangement. This is perceived by GEM as having similar effect to an LGS designation. A formal response would require taking views from the company members, namely the residents (that is, not just the GEM Board of Directors).	ES

1.5	Organisation(s) or individual(s) proposing the site for LGS designation	
	e.g. the Parish Council itself, a specific community	
	group, or an informal group of residents	
	Histon and Impington Parish Council	
1.6	Community served by the candidate LGS	
	Does the site serve the whole village or a particular	
	geographic sector of it or a particular interest	
	group?	
	The site is primarily used by residents of the	
	Greenleas estate who live near to and around the	
	open area.	
2	PLANNING HISTORY AND LEGAL	
	STATUS	
2.1	Is there currently a planning application for this site?	
	If permitted, could part of the overall site still be	
	used as a Local Green Space?	
	No.	
2.2	Is the site currently allocated for development in the	
	draft Neighbourhood Plan?	
	If development were permitted, could part of the	
	overall site still be used as a Local Green Space?	
	No.	
2.3	Does the site have any existing legal protection of	
	any kind and since when? Or has it ever been	
	proposed for legal protection? e.g. Local Nature	
	Reserve, Village Green, land designated as open access in agreement with the landowner. Also	
	Protected Village Amenity Area PVAA, which is	
	similar to LGS but not as strong in restricting	
	development.	
	The site is protected through legal instruments for	ES
	use as a communal open space / amenity area. All	
	owners in the estate are legally bound to contribute	
	to the upkeep of the open space.	
3.	SIZE, SCALE AND "LOCAL NATURE" OF	
	CANDIDATE LGS	
3.1	Area of proposed site (preferably in hectares)	(No fixed limits. Cotswold District
		suggests an upper limit of 20ha for LGS
		designation)
	0.4ha	https://magic.defra.gov.uk/MagicMap.
		<u>aspx</u>
3.2	Is the site an "extensive tract of land"?	
	Extensive tracts can't be designated as LGS but	
	"extensive" is not defined. How large is it in	
	"extensive" is not defined. How large is it in comparison to other groups of fields or areas of land	
	"extensive" is not defined. How large is it in	

	No.	
	It is a modest area of grass, hedge and trees	
	surrounded by housing.	
3.3	What makes the site "local in character"?	To avoid repetition you may be able to
	How does the site connect physically, ecologically,	simply refer to other sections of this
	visually and socially to the local area?	template e.g. on recreation.
	The site is used by families from the adjacent houses	JFP pers obs
	for outside time activities. It also provides a pleasant	
	outlook for residents young and old.	
4.	NEED FOR AND PROXIMITY /	
	ACCESSIBILITY OF GREEN SPACE	
4.1	Is there a particular need for a Local Green Space in	Make this specific. General shortage in
	this location?	H&I is described in the framework
	e.g. is there a shortage of accessible green space in	document.
	this location? Has the need been identified in other	
	assessments or surveys?	
	At the time the estate was developed (186 houses)	JFP internet search
	in the early 1970s, planning permission was	
	conditional on provision of communal open spaces	
	and amenity areas.	
	The proposed LGS covers the largest tract of	
	contiguous open space provided.	
	The site is especially valuable for being in a quiet	
	location on the doorstep of many family homes.	
	Other village play areas are some distance away	
	(> 600m), making them far less suited for spur-of-	
	the-moment outdoor activity.	
4.2	How far is the site from the community it serves?	It may be helpful to attach a map or
7.2	It should be in "reasonably close proximity" but this	diagram showing proximity and access.
	is not defined.	and access.
	The site is in the middle of the community it serves.	
4.3	Are there any barriers to the community accessing	
4.5	the site from their homes? If so, how could they be	
	overcome? e.g. a busy road to be crossed	
	There are no barriers to entry. Some residents can	
	access the site without crossing any roads; others	
	must cross the generally very quiet estate roads.	
5.	EVIDENCE THAT IT IS SPECIAL TO THE	
	COMMUNITY	
5.1	List the community organisations, societies, local	Attach evidence, which could be letters
	leaders, schools, organisations concerned with	of support, petitions, surveys, council
	health and well-being, groups of residents or other	resolutions etc.
	groups, who have expressed support for the	
	protection of this site?	
	protection of this site?	

	This is a much appreciated open space, the maintenance of which is paid for by the owners on the estate and managed by Greenleas Estate Management Ltd. It is used by families for informal games and appreciated by residents of all ages for being a green lung and, at certain times of the day, for its tranquillity.	ES plus JFP
6.	EVIDENCE OF LOCAL SIGNIFICANCE FOR	
0.		
	BEAUTY OR TRANQUILLITY	
6.1	Is this criterion relevant for this site?	If no, go on to the next section
	Yes.	
6.2	If yes, describe briefly the views and other characteristics that contribute to this beauty and/or tranquillity. Why do local people consider it to be of particular significance?	If possible, provide photographic or other evidence.
	Whilst the area is used by families for games, it is also a spot where older residents, in particular at certain times of the day, can enjoy a quiet walk or to look out on. The hedge and trees combine to make this a quiet oasis surrounded by housing.	
7.	EVIDENCE OF LOCAL SIGNIFICANCE	H&I Historical Society could compile
1.	FOR HISTORICAL OR CULTURAL VALUE	this section, where relevant.
7.1	Is this criterion relevant for this site? No.	If no, go on to the next section
7.2	Describe the associated historic buildings, memorials, gardens, landscape features (e.g. old hedgerows, trees or ponds), cultural activities or relevance to the historic development of the village (e.g. fruit and jam production).	If possible, provide references or other evidence.
	No.	
8.	EVIDENCE OF LOCAL SIGNIFICANCE FORRECREATION	H&I Walking Group, Histon Hobblers, Cycling Group, youth groups and others could compile this section, where relevant.
8.1	Is this criterion relevant for this site?	If no, go on to the next section
	Yes.	
8.2	Is the site used for playing sport? If so, which sports, involving which sections of the community? Since when has it been used for sport? Is it free or does it require club membership?	
	No.	
8.3	Is the public able to physically access the site? e.g. public rights of way across or adjacent to the site. Has access been allowed hitherto on a discretionary basis? Is there access to the whole site or just part of it? Is there good disabled access? (A site can still be designated even if there is no public access).	
	The site has unrestricted access. Some parts of the	

-		
8.4	Is the site used for walking, dog-walking, foraging	
	(berries etc), birding, nature observation, horse-	
	riding, cycling, youth gatherings, children's games or other informal recreation?	
	If so, how much is it used and by which parts of the	
	community? Since when has it had these uses?	
	The site provides a green open space in the	JN / JFP
	community, adding visual amenity and a place to	
	walk to and through.	
	Its other main use is for informal children's games.	
	It has had these uses since the space was created when the Greenleas estate was developed in the	
	early 1970s.	
	The site attracts urban birds (blackbirds, starlings)	
	giving residents opportunity to feel some closeness	
	to nature.	
9.	EVIDENCE OF LOCAL SIGNIFICANCE	
	FOR RICHNESS OF WILDLIFE	
9.1	Is this criterion relevant for this site?	If no, go on to the next section
9.1	No.	
9.2	What wildlife of interest to the community has been	Consider sightings within the past five
5.2	found on the site?	years. To organise species information,
	Include plants, fungi, mammals, birds, amphibians,	a checklist of potential species will be
	invertebrates etc. Explain briefly the use of the site	made available. Additional species can
	by the species concerned and the conservation	be added, as needed. The checklist and
	requirements. Mention any population trends,	other evidence should be provided as
	supported by monitoring data or anecdotal evidence.	an attachment.
9.3	Are any of the habitats or species found on the site	For national and county priority
	considered to be of special importance? e.g.	species, see <u>CPbiodiversity</u> . Consider
	habitats or species in national or regional lists of	sightings within the past five years.
	priorities or in a biodiversity action plan. Explain	Elaborate further in an attachment, if
	briefly the use of the site by the species concerned	necessary
	and the conservation requirements, if not already covered above.	
9.4	Are there trees with preservation orders in the site?	Parish Council tree warden could
	If so, how many, which species and what special	provide the information for this
	characteristics?	question. South Cambs Local Plan
		policy NH/7 (paras 6.32-6.33) on
		ancient woodlands and veteran trees is relevant on this question.
	No	
9.5	What has been the involvement of community	You could attach copies of materials
	members in studying, observing or simply enjoying	produced, if appropriate.
	the wildlife of this site?	
	Have local people been monitoring the site or	
	recording its species and, if so, for how long? Have	
	they produced any data sets, articles, reports, blogs, talks, exhibits etc about any of the wildlife present at	
	the site?	

		There is continue to be accounted to the
10.	EVIDENCE OF LOCAL SIGNIFICANCE	There is unlikely to be quantitative data on ecosystem services, but you can
	FOR OTHER ECOSYSTEM SERVICES	make qualitative arguments – as
		specific as possible. In some cases
		there may be supporting anecdotal
		evidence (e.g. of pollinator activity).
10.1	Is this criterion relevant for this site?	If no, go on to the next section
	No.	
10.2	Does the site contribute significantly to flood	Attach supporting documents,
	prevention, absorption of rainwater or maintenance	diagrams etc, if needed.
	of water quality (by reducing run-off of silt,	
	agrochemicals and other pollutants into water	
	courses)? If so, describe briefly the function and

If no, go on to the next section Attach a map or diagram to illustrate

11.3	Is the site connected – or potentially connected – for recreational purposes to other green areas? If so, which other areas and for which kinds of recreation? Which parts of the community use the connected green areas and how much? This will generally be about walking, dog-walking, running, horse-riding and cycling routes, which link green areas in a loop. If the connectivity is only potential, indicate briefly how it could be achieved e.g. by establishing an additional permissive way. No.	Attach a map or diagram to illustrate the connectivity, or simply cross-refer to the ecological connectivity, if the links are similar.
12.	EVIDENCE OF ANY OTHER SPECIAL LOCAL SIGNIFICANCE	
	If there is any other special characteristic or local significance relevant to the site's designation as a Local Green Space but not covered above, please state it here.	
	No.
